HOW TO CALCULATE

Step 1 - Multiply the TV DV by the current uplift factor (Up-Lift is a balancing factor that Herbalife uses currently 1.22 but verify with your upline TAB member each month)

Example - 16,500 TV DV (in your from 3) X 1.22 = 20,130

Step 2 - Take total from Step 1 and multiply it by 5% (assuming that you personally have 2500 dvp - you will receive 1% for every 500 dvp you accumulate up to 5%)

Example - 20,130 TV DV (in your from 3) X 0.05 (5%) = 1,006.5 Royalties

Step 3 - Figure income (every royalty point is equal to \$1)

Example - 1,006.5 Royalties = \$1,006.50 Royalty Check

Royalties at each level of the Marketing Plan assuming uplift of 1.22
